1 INTRODUCING AJAX SHOPPING CART

Ajax Shopping Cart is a module Magento Extension that allows users to add, remove and update products to cart without reloading the whole page. It is much easier and faster for customers to buy products at your store.

2 INSTALLATION

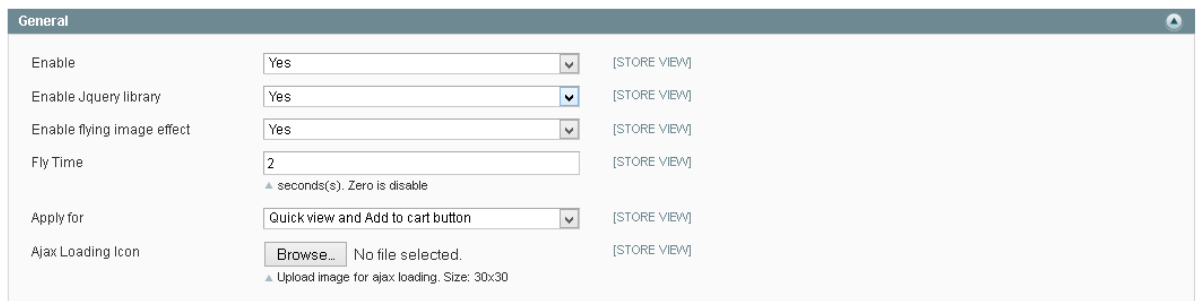

1. After purchasing the extension, you will receive an email that includes the link download and License Key. If you don't receive the email, you can directly login to your account dashboard at Mage-Addons website then go to My Downloadable Products to get link download and License Key. Download zip package of extension.
2. Use FTP client (such as Filezilla, WinSCP, cuteFtp) to upload or copy all folders in the zip package to your Magento site root folder. This will not overwrite any existing file, just add new files to the folder structure.
3. That's all.

3 CONFIGURATION

Configuration Ajax Shopping Cart options are available in administration panel:

System --> Configuration --> Padoosoft Extension --> Ajax Shopping.

3.1 General settings

4 UNINSTALLATION

If you require to disable the extension without removing it completely, go to System -> Configuration -> Advanced -> Advanced -> Disable Modules Output and disable the module Padoo_Ajaxshopping. Also, the extension can be switched off following steps without deleting the files of the extension.

- Login to your FTP, navigate to app/etc/modules/
- Open the file Padoo_Ajaxshopping.xml and change the following line:
Form <active>True</active>
To <active>False</active>
- Clear the cache under var/cache

 **But if installation requires some customization based on theme/layout then we will charge you for extra work. Hope you can understand this.**
