1 INTRODUCING ONE PAGE CHECKOUT

One page checkout extension help you increase customer conversation rate by help customer quick complete checkout process with just a step. Also support both change coupon and update and remove cart on checkout that no reloading page.

2 INSTALLATION

1. After purchasing the extension, you will receive an email that includes the link download and License Key. If you don't receive the email, you can directly login to your account dashboard at Mage-Addons website then go to My Downloadable Products to get link download and License Key. Download zip package of extension.
2. Use FTP client (such as Filezilla, WinSCP, cuteFtp) to upload or copy all folders in the zip package to your Magento site root folder. This will not overwrite any existing file, just add new files to the folder structure.
3. That's all.

3 CONFIGURATION

Configuration One Page Checkout options are available in administration panel:

System --> Configuration --> Padoo Extension --> One page checkout.

4 UNINSTALLATION

If you require to disable the extension without removing it completely, go to System -> Configuration -> Advanced -> Advanced -> Disable Modules Output and disable the module Padoo_Onepagecheckout. Also, the extension can be switched off following steps without deleting the files of the extension.

- Login to your FTP, navigate to app/etc/modules/
- Open the file Padoo_Onepagecheckout.xml and change the following line:
From <active>True</active>
To <active>False</active>
- Clear the cache under var/cache

 **But if installation requires some customization based on theme/layout then we will charge you for extra work. Hope you can understand this.**
