1 INTRODUCTION

Quick Login Magento Extension allows to quickly login or register on your store with ajax technical without reloading page. And It now supports login to your store with popular social networks such as facebook, twitter, google++ and linked thus allowing your customers to use a single Magento social login to access your site.

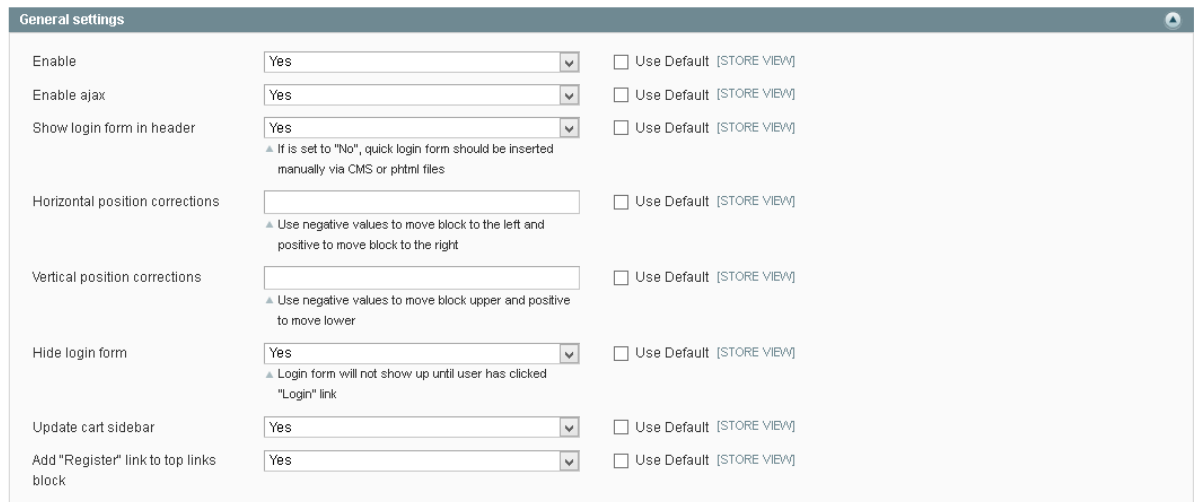

2 INSTALLATION

1. After purchasing the extension, you will receive an email that includes the link download and License Key. If you don't receive the email, you can directly login to your account dashboard at Mage-Addons website then go to My Downloadable Products to get link download and License Key. Download zip package of extension.
2. Use FTP client (such as Filezilla, WinSCP, cuteFtp) to upload or copy all folders in the zip package to your Magento site root folder. This will not overwrite any existing file, just add new files to the folder structure.
3. That's all.

3 CONFIGURATION

-  Login with Google
-  Login with Twitter
-  Login with LinkedIn
-  Login with Naver
-  Login with Kakao
-  Login with Daum

4 UNINSTALLATION

If you require to disable the extension without removing it completely, go to System -> Configuration -> Advanced -> Advanced -> Disable Modules Output and disable the module Padoo_Testimonial. Also, the extension can be switched off following steps without deleting the files of the extension.

- Login to your FTP, navigate to app/etc/modules/
- Open the file Padoo_Testimonial.xml and change the following line:
Form <active>True</active>
To <active>False</active>
- Clear the cache under var/cache

 **But if installation requires some customization based on theme/layout then we will charge you for extra work. Hope you can understand this.**
